NOVUS

NOVUS HELMET

CITY | SIZE: XS - 2XL

Lightweight outer shell is constructed from an advanced, injection-molded thermoplastic resin for excellent impact protection and optimized levels of weight distribution, comfort and strength. The Novus Helmet is homologated to ECE 22.05 standards. Multiple density inner shell constructed from fused closed-cell polymer foam which helps channel impact energy away from the head in the event of a crash and increases mechanical resistance in the event of accidental shock.

Specifically profiled outer shell for excellent aerodynamic performance, offering increased aerodynamic stability at speed.

Open-face design for convenience of entry and increased width and range of vision, plus extended low profile for increased protective coverage.

Adjustable ventilation system features triple air intakes and two exhaust ports. Ventilation system is engineered to guarantee ample and equal internal airflow, keeping the rider comfortable on short or long rides. Vent is activated by a cable slider system allowing the rider to regulate and personalize the level of cooling airflow.

Extended, anti-scratch visor is homologated and is constructed from advanced polycarbonate for strength. Visor offers coverage to lower face when closed and flips up neatly and securely. The visor includes a lock to ensure closure. It is designed to minimize turbulence and reduce aerodynamic noise (in conjunction with the internal padding) in the closed position. Visor is removable and easy to replace.

Built-in internal tinted sun shield visor made of injected polycarbonate offers effective protection from the direct sunlight. Sun shield is anti-scratch. Sun visor is activated by a cable slider system allowing rider to regulate visor according to needs. Sun shield is removable.

Chin closure system features micro-adjustment buckle for precise and personalized fit.

Premium quality internal padding is constructed from multiple density foam padding for comfort and is especially designed for exceptional facial contouring.

Moisture-wicking comfort textile used throughout helps prevent build-up of sweat. Interior sections are removable and washable.

Internal padding includes adaptive fit technology allowing helmet to be precisely configured to wide range of head shapes and sizes.

The Alpinestars Novus helmet incorporates A-HEAD adjustment technology which allows the fit to be fully customized. An industry-first, micro-adjustment system, A-HEAD is made up of two patented adjustment structures – one for the adjusting the fit around the circumference of the head – and another for adjusting the fit on the top of the head and improved levels of comfort and security.

Equipped with 'A-Connect', an (optional) Bluetooth bike-to-passenger or bike-to-bike intercom communication system, allowing you to:

- Speak to another 'A-Connect' equipped helmet within a maximum distance of 200m.
- Link your helmet as a hands free headset to your Bluetooth-enabled phone.
- Listen to stereo music from a Bluetooth A2DP enabled phone or MP3 player, and control it remotely if your device also supports AVRCP (Audio-Video Remote Control Protocol).
- Compatible for use with mobile phone, MP3, GPS connection.

NUCLEON KR-1 CELL BACK PROTECTOR

PROTECTION | SIZE: XS-S-M-L-XL

- Cell Technology back protector is constructed from a high performance polymeric material blend for optimized flexibility and excellent weight saving properties.
- Developed in three waist-to-shoulder dimensions in order to cover all body sizes.
- Extended lower back protector offers more protection to the rider.
- Highly perforated for maximum breathability and ventilation.
- Horizontal flexion grooves for an adaptive fit in different riding positions.
- Adjustable and detachable elastic shoulder straps via a snap fit system for greater comfort.
- Compatible with the Nucleon KR-C protector by removing the adjustable straps.
- Compatible with the Nucleon KR-TB protector for extended lower spine protection.
- Height adjustable kidney belt featuring dual hook and loop closure system for easy, secure closure.
- Soft Bio-Foam padded chassis for maximum comfort.
- According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply to this product:
- Back protector according with the EN 1621-2 : 2014 Level 2.

NUCLEON KR-2 PROTECTOR

PROTECTION | SIZE: XS-S-M-L-XL

- Back protector developed in three waist to shoulder dimensions in order to cover all the body sizes.
- Back shell plate is constructed from a high performance polymeric material blend for optimized flexibility and excellent weight-saving properties.
- Soft viscoelastic compound developed for all the Nucleon protectors 2018.
- Hybrid construction: lattice shell with a new viscoelastic PU foam compound.
- Single injected lattice structure shell constructed with ergonomic design to absorb high impacts and allow maximum breathability and air flow.
- In combination with the Nucleon, PU foam on the central spine area offers extraordinary performance on impact absorption.
- Additional convex design on the central hard shell provides highest protection of the spine.
- Horizontal flex grooves for an adaptive fit in all riding positions.
- Adjustable rib protector made by a high performance polymeric material blend for additional side protection.
- Shoulder blade protective padding extensions to protect the acromion bones.
- Waist adjustment for customized fit and slim vented kidney belt for added position stability and security.
- Adjustable and detachable elastic shoulder straps via snap fit system to allow a more comfortable use of the protector.

TECH-AIR[®]

COMPATIBLE

SENSORS

Electronic sensors incorporated in the system's chassis, meaning it is completely self-contained and allows it to be worn interchangeably with compatible garments.

INTEGRAL BLADDER

Built to withstand extreme impacts of force and inflates at a calculated rate of ~25 milliseconds.

ACU

System's firmware within the Airbag Control Unit (ACU) is upgradeable and can be configured to run the Tech-Air[®] E-Street airbag settings for non-racing use in road and light off-road situations.

EXTENDED SHOULDERS

Ergonomically profiled, performance fit airbag that covers and protects the most vulnerable parts of the body.

BATTERY

System uses an integrated, certified lithium-ion battery, with a battery life of 25 riding hours.

System goes into sleep mode when non-riding.

CARTRIDGE CONNECTION

Argon cartridges are rechargeable at your local service station.

CARTRIDGES

Argon inflator cartridges are CE certified to ISO 14451 standard, and will only fire if commanded by the electronic unit.

It also certifies that the cartridges can be safely handled, assembled and transported.

COVERAGE

Comprehensive inflatable upper body protection for back, shoulders, kidney area, chest and upper abdomen.

TECH-AIR® SYSTEM

- System's firmware is upgradable and can be configured to run the Tech-Air® Street airbag settings for non racing use in road and off-road situations.
- Ergonomically profiled, performance fit airbag vest optimized for use with compatible racing /performance riding airbag leather suit.
- Airbag Control Unit incorporated within strong, lightweight, ergonomic polymer back protector, specially optimized for race and track use.
- Electronic sensors incorporated in the system's chassis, meaning vest is completely self-contained and allows it to be worn interchangeably with compatible garments.
- Advanced multi-material main shell incorporates Lycra®, 2D mesh and Cordura.
- Interior comprises of perforate Lycra, 3D mesh and comfort edging for high levels of comfort.
- Specially designed, race-developed back protector.
- Comprehensive inflatable upper body protection for back shoulders, kidney area, chest and upper abdomen.
- Incorporates removable inner mesh and elastic hook and loop waistband to position airbag system to customize fit and improve adjustability.
- Argon inflator cartridges are to ISO 14451 standard.
- ACU is seal-protected within vest to ensure its all-weather performance and the vest and componentry are certified.
- ACU has been homologated to ECE R10 04, which ensures the electromagnetic integrity and stability of the unit.
- System uses an integrated, certified lithium ion battery, with a battery life of 25 hours and a recharge time of approximately 6 hours. Micro USB charger allows convenient recharging of system, with one hour of charging time giving four hours of riding coverage.
- Color coded front YKK zippers allow for vest to be easily and securely attached to outer jacket.
- Category II to the 686/89/EEC European PPE Directive, using a version of EN1621-4:2013, which guarantees impact protection performance between 45 milliseconds to 5 seconds.
- System features Dual Charge capability for M-XL sizes (2XL garments have only single charge capacity).
- Design and manufacture to the 2007/23/EC pyrotechnic directive.

G. HEIGHT IN	47 ¼ - 51	51 - 55	55 - 59	59 - 63

HOW TO MEASURE

A. Chest - Measure around the fullest part, under the armpits, keeping the tape horizontal.

B. Waist - Measure around the natural waist line, inline with the navel, keeping the tape horizontal.

C. Hip - Measure around the fullest part of your hips, about 20cm below waist line, keeping the tape horizontal.

D. Thigh - Measure around the thigh just below the crotch, keeping the tape horizontal.

E. Inseam - Stand against a wall, ask someone else to measure from the crotch to the bottom of your leg.

F. Arm Length - Measure from shoulder (Humerus) to wrist.

G. Height - Stand against a wall, ask someone else to measure from the floor to the top of your head, keeping the tape vertical.

GLOSSARY

4-IN-1 SYSTEM - Interchangeable system incorporating the removable, waterproof and breathable drystar® liner and removable thermal liner. The 4-in-1 system enables the jacket to be used with the drystar® and thermal liners together; the drystar® or thermal liner by themselves; or without either liner, allowing the jacket to be configured in 4 different ways to suit any climatic condition.

ARMACOR™ - Product technology it's a patented lattice structure with an integrated dupont™ kevlar® fiber core. This technology offers extreme tear and abrasion resistance yet lighter weight. Incorporated into a Gore-Tex Pro shell motorcycling jacket, it will protect enthusiastic motorcyclists in the event of a fall. This means safety and enhanced comfort – in all-weather conditions.

CE-CERTIFICATION - Protection and protectors that are ce-certified have met the strict performance standards and requirements of the European Union.

CLARINO® - This highly durable material provides great feel for the palm. Machine washable, clarino® remains soft and supple even after repeated exposure to water.

CLIMATE CONTROL SYSTEM - System of zippered air intakes and exhausts that allow precise control of airflow while riding for superior body temperature regulation.

COOLMAX® - This unique material “wicks” moisture away from the skin and quickly transfers it to the outer surface to speed up evaporation.

CORDURA® - This textured nylon is durable, lightweight and abrasion resistant

DENIER - Denier is a measurement which denotes the thickness and the diameter of a fiber material.

DRYSTAR® - Alpinestars waterproof and breathable membrane for all-weather comfort and performance.

DRYSTAR® PERFORMANCE - Alpinestars exclusive sealed triple layer construction technology which bonds all layers in glove, thereby affording a highly reduced material chassis to promote good levels of sensitivity of bike controls.

E.V.A. - This comfortable and lightweight material provides superior shock absorption and impact protection.

GORE-TEX - This world renowned waterproof and breathable membrane features pores that are smaller than water to keep rain out, but larger than water vapor, allowing perspiration to escape.

GORE-TEX INFINIUM WITH WINDSTOPPER TECHNOLOGY - Laminated membrane offering total windproof performance and maximum breathability for complete comfort.

GORE-TEX PRO SHELL - It is the optimum solution for outdoor professionals and serious enthusiasts, who need to face extreme weather and tough conditions. Made with the most rugged, most breathable, durably waterproof and windproof fabrics.

GORE-TEX PACLITE® SHELL - Combines extreme breathability and durable wind and waterproofness with minimum weight and pack volume.

GORE-TEX SOFT SHELL - Constructed with soft and warm fabrics, they are designed for reduced layering and improved freedom of movement in colder conditions.

GORE-TEX WITH GORE GRIP TECHNOLOGY - Sealed triple layer material construction from Gore-Tex for improved dexterity, grip and control sensitivity.

PERFORMANCE SHELL - Designed to provide comfort and durable waterproof protection.

DUPONT™ KEVLAR® - Used as a reinforcement, this high strength fiber is cut and tear resistant.

NEOPRENE - Comfortable and flexible, this water resistant material provides great insulation in cold and damp conditions and excellent wind stopping performance.

OUTDRY® - Innovative heat-bonded membrane construction which provides an impenetrable layer with no seams, preventing water collecting between the layers for a lightweight improved fit, greater dexterity and comfort.

PITTARDS® DIGITAL LEATHER - Supple and quick drying leather which provides excellent grip in all-weather conditions.

SCHOELLER® KEPROTEC® - This stretchable and vented material features dupont™ kevlar® reinforced thread for maximum tear and abrasion resistance.

SUBLIMATED GRAPHICS - Utilizing a pressure and heat process, this system of design transfer produces fade free graphics even after extensive washing.

SUPERFABRIC® - Flexible, ceramic reinforced fabric that is extremely abrasion, puncture and cut resistant making it ideally suited for application on exposed areas such as knees and elbows.

TAPED SEAMS - Seam tape is applied along the stitch line of the garment, which prevents water intrusion at these small but critical areas.

TASLAN - Durable and water repelling nylon fabric.

THINSULATE® - Lightweight, breathable, moisture resistant and quick drying, Thinsulate® provides superior insulation for cold weather riding.

PRIMALOFT® - A lightweight, breathable insulation that repels moisture to offer superior performance for cold-weather riding.

PE - Polyethylene - Thermoplastic material composed of polymers of ethylene. It is light, strong, water resistant and flexible at low temperatures.

PU - Polyurethane - Polymer containing urethane used in plastics, rubber, foam, etc.

PU COATING - A thin layer of film applied to the backside of the fabric to give strength, structural integrity and water resistance.

TPU - Thermoplastic polyurethane. A hybrid material - a mixture between hard plastic and soft silicone. A very dense and smooth rubber.
